SUPER PETREL LS TYPE CONVERSION SYLLABUS

The Super Petrel LS type conversion syllabus is a combination of 2 (TWO) stages of which includes Land and Water Operations. However, the water operation in stage 2 is optional to pilot(s) to participate.

Stage 1

Objectives

The pilot will obtain the aeronautical knowledge, skills and experience necessary to operate a seaplane/amphibian aircraft on land.

Completion Standards

The pilot must demonstrate through a check ride and the necessary aeronautical skills and knowledge in order to operate a seaplane/amphibian on land operation safely.

STAGE 1 – LAND OPERATION	Flight Lesson
Flight Lesson 1 – Familiarization (Aircraft System, Procedures)	1.0
Flight Lesson 2 – General Handling 1 (S&L, Cimb & Desc., Med.Turns, Circuits)	1.0
Flight Lesson 3 – General Handling 2 (Steep Turns, Stall 1, Circuits)	1.0
Flight Lesson 4 – General Handling 3 (Stall 2, PFL, Circuits)	1.0
Flight Lesson 5 – Practical Test Review	1.0
Stage Totals	5.0

Stage 2 – Optional

Objectives

The pilot will obtain the aeronautical knowledge, skills and experience necessary to operate a seaplane/amphibian aircraft.

Completion Standards

The pilot must demonstrate through a check ride and the necessary aeronautical skills and knowledge in order to operate water operation safely.

STAGE 2 - WATER OPERATION	Flight Lesson
Flight Lesson 1 – Intro to Seaplane Operations	1.0
Flight Lesson 2 – Operating on the Water	1.0
Flight Lesson 3 – Landing and Emergency Procedures	1.0
Flight Lesson 4 – Advanced Takeoff and Landing	1.0
Flight Lesson 5 – Practical Test Review	1.0
Stage Totals	5.0
